

Sugarplex Cu

High efficiency copper

Supply of copper (Cu) carried by sugars

Cu

GLY

Care and prevent copper microcarenze

Cu

Immediate translocation and organization of the nutritional element made

GLY

Prevents the formation of chlorosis and necrosis in the apical leaves

Cu

It balances any excess of nitrogenous fertilization

Cu

Products available in:

1 kg bottle

5 kg tank

GLY

Mainly made of sucrose, they are easily absorbed by the plant as they are made up of simple carboxylic chains. They help to convey other elements within plant tissues and at the same time provide energy to cultivated plants. In the soil they favor the development of useful micro-organisms contributing to plant well-being.

The sugars contained in the ED & F Man products are extracted from plant tissues (beetroot and sugar cane).
