

# Betabio Active

## Energy for organic crops

Increase of nutrient efficiency (vehiculation, modulation, absorption)

AA

GLY

Energy for plants and useful microorganisms

AA

GLY

Regulates and balances plant growth (roots, shoots, fruits)

AA

Intensifies photosynthetic activity and increases productions

Products available in:

25 kg tank

IBC of 1250 kg

AA

The amino acid complex particularly rich in Glutamic Acid, in addition to being a precursor for the synthesis of all the other essential amino acids, increases the synthesis of chlorophyll, regulates the stomatal opening and increases the fertility of the pollen.

The totally vegetal origin of the Amino Acidi contained in the ED & F Man products allows its application without any restriction on all edible parts of the crops.

GLY

Mainly made of sucrose, they are easily absorbed by the plant as they are made up of simple carboxylic chains. They help to convey other elements within plant tissues and at the same time provide energy to cultivated plants. In the soil they favor the development of useful micro-organisms contributing to plant well-being.

The sugars contained in the ED & F Man products are extracted from plant tissues (beetroot and sugar cane).
